SUMMARY

Web Developer with 4 years, specializing as a Web Developer. Dynamic and results-driven web developer with extensive experience in both front-end and back-end technologies. Proficient in JavaScript, React, NodeJS, NextJS, jQuery, HTML, CSS, GraphQL, MongoDB, Firebase, and MUI. Committed to delivering high-quality, user-friendly web applications and engaging in client communication to align solutions with business objectives. Adept at working in agile environments, fostering collaboration, and optimizing performance for scalable applications.

EXPERIENCE

Web Developer

Baliosoft Solutions Pvt. Ltd.

November 2024 – Present, Ahmedabad, Gujarat

- At Baliosoft Solutions Pvt. Ltd., I worked as a Web Developer specializing in HTML, CSS, JavaScript, and SharePoint. My role involved designing and developing responsive web pages, customizing SharePoint sites, integrating various front-end technologies, and ensuring seamless user experiences across different platforms and devices.

Web Developer

IIH Global Pvt. Ltd.

January 2024 – November 2024, Ahmedabad, Gujarat

- Experienced and detail-oriented web developer at IIH Global Pvt. Ltd. with a proven track record in creating dynamic, high-performance web applications. Proficient in modern technologies including JavaScript, ReactJS, NodeJS, NextJS, jQuery, HTML, CSS, GraphQL, React Query, MongoDB, Firebase, and Material-UI (MUI). Adept at designing and developing user-friendly interfaces, optimizing front-end performance, and integrating complex back-end solutions. Committed to delivering scalable, maintainable, and high-quality code in agile environments, with a focus on enhancing user experience and driving business growth.

Frontend Web Developer

Yudiz Solutions Ltd.

June 2022 – January 2024, Ahmedabad, Gujarat

- Developed dynamic, responsive web applications using JavaScript, ReactJS, NextJS, jQuery, HTML, CSS, GraphQL, React Query, MongoDB, Firebase, and MUI. Focused on optimizing user interfaces, improving front-end performance, and integrating complex back-end data solutions. Collaborated in agile teams to deliver scalable, user-friendly digital products.

Junior Web Developer

D2TEK

October 2020 – May 2022, Surat, Gujarat

- Contributed to building responsive web applications using JavaScript, React, HTML, and CSS. Focused on creating clean, user-friendly interfaces and enhancing front-end performance. Worked closely with teams to ensure seamless user experiences and high-quality code delivery.

PROJECTS

Loopedin

IIH Global • www.loopedin.io/

- Led the development of Loopedin as a Full Stack Developer, using JavaScript, NodeJS, jQuery, HTML, CSS, and MongoDB. Responsible for both front-end and back-end development, delivering scalable solutions. Actively communicated with clients to gather requirements, provide updates, and ensure project alignment with business goals.

EQL Global

IIH Global • www.eqlglobal.com/

- Developed EQL Global as a Full Stack Developer, utilizing NextJS, NodeJS, MUI, CSS, and MongoDB. Responsible for both front-end and back-end development, ensuring seamless functionality and user experience. Engaged in direct client communication to gather requirements, provide updates, and deliver tailored solutions.

999Tee

Yudiz Solutions Ltd. • 999tee.com/

- Worked on the 999Tee project as a Frontend Developer, utilizing React and GraphQL to build responsive and interactive user interfaces. Collaborated directly with clients to gather feedback, align development with their vision, and ensure smooth project progress and delivery.

CricTracker

Yudiz Solutions Ltd. • crictracker.com/

- Team Collaboration: Worked collaboratively in a team of 5 developers, comprising UI designers, backend developers, and fellow front-end developers.
- Development and Design: Constructed and designed reusable components and pages, ensuring full responsiveness in alignment with Adobe XD designs.
- Actively contributed to the CricTracker Website and Admin Panel, focusing on designing components, pages, and handling API integration for both.
- API Integration: Successfully integrated GraphQL APIs, facilitating seamless data exchange to enhance the platform's capabilities.
- Project Management: Played a pivotal role in debugging, bug fixing, and deploying the project on various servers, including Development, Staging, and Production, ensuring optimal performance and accessibility.
- Worked on enhancing Core Web Vitals and Page Speed Score, optimizing the website's performance.
- Built and managed AMP (Accelerated Mobile Pages) to further improve mobile user experience.

SportsBuzz

Yudiz Solutions Ltd. • www.sportsbuzz.com/

- Team Collaboration: Part of an 8-member team, working closely with UI designers, backend developers, and fellow front-end developers.
- Development and Design: Designed and constructed reusable components and pages, adhering to Figma designs and ensuring responsiveness.
- Actively contributed to both the SportsBuzz Website and Admin Panel, taking charge of designing components, pages, and API integration.
- Team Communication: Engaged in daily team calls and stand-up meetings on Slack to foster collaboration and project progress.
- Junior Developer Management: Managed Junior Developer's Pull Requests on GitHub, ensuring a smooth integration process by merging them into various deployment repositories.
- Performance Optimization: Built and maintained AMP (Accelerated Mobile Pages) to enhance the mobile user experience.
- Worked on improving Core Web Vitals and Page Speed Score, optimizing the website's overall performance.
- Project and Task Management: Utilized Jira for project and task sprint management, aiding in efficient project organization.
- Assigned tasks to junior front-end developers according to sprint objectives, playing an active role in debugging, bug fixing, and deploying the project on different servers for accessibility.
